Innovative Dashboard Overview

- **Booking Panel**

The dashboard features a **Booking Panel** that allows users to easily schedule trips, including options for **recurring trips** to streamline corporate commuting.

- **Live Map Dashboard**

A **Live Map Dashboard** displays real-time locations of cabs, providing full visibility and enhancing efficiency for corporate travel management.

- **Expense Analytics**

An **Expense/Usage Analytics Dashboard** provides detailed insights on travel expenditures, helping organizations track and manage their corporate commute costs.

- **Mock UI Demonstration**

An optional **mock UI** can be shown during the demo to give stakeholders a hands-on feel of the dashboard functionalities and layout.

Inefficiencies in Cab Booking

Lack of Centralized Booking

Absence of a **centralized cab booking system** across branches leads to fragmented processes and inefficiencies.

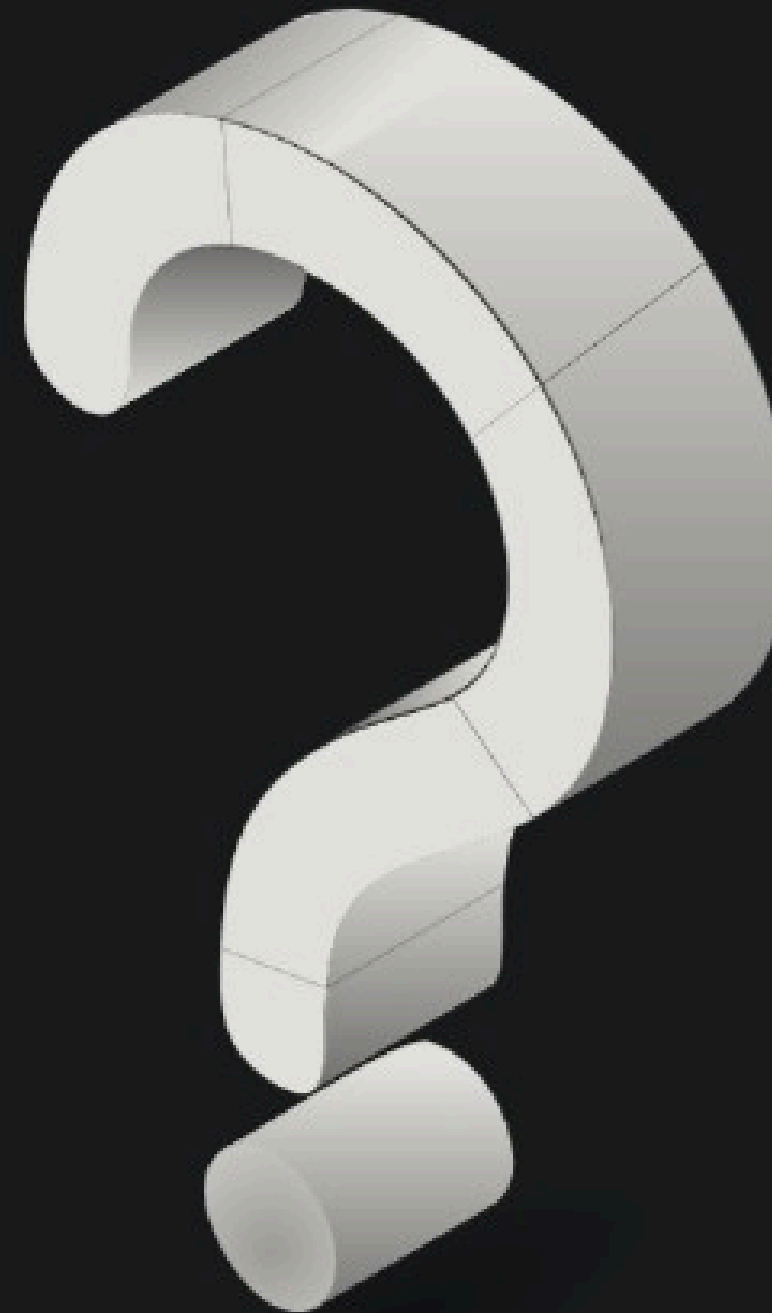

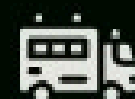

Manual Cost Tracking Issues

Manual and error-prone methods for cost tracking result in inaccuracies and inflated transport expenses.

Increased Transport Costs

Overall, these inefficiencies contribute to **higher transport costs** and operational challenges for the organization.

No Real-Time Tracking

The inability to **track trips in real-time** results in a lack of visibility and accountability during transport.

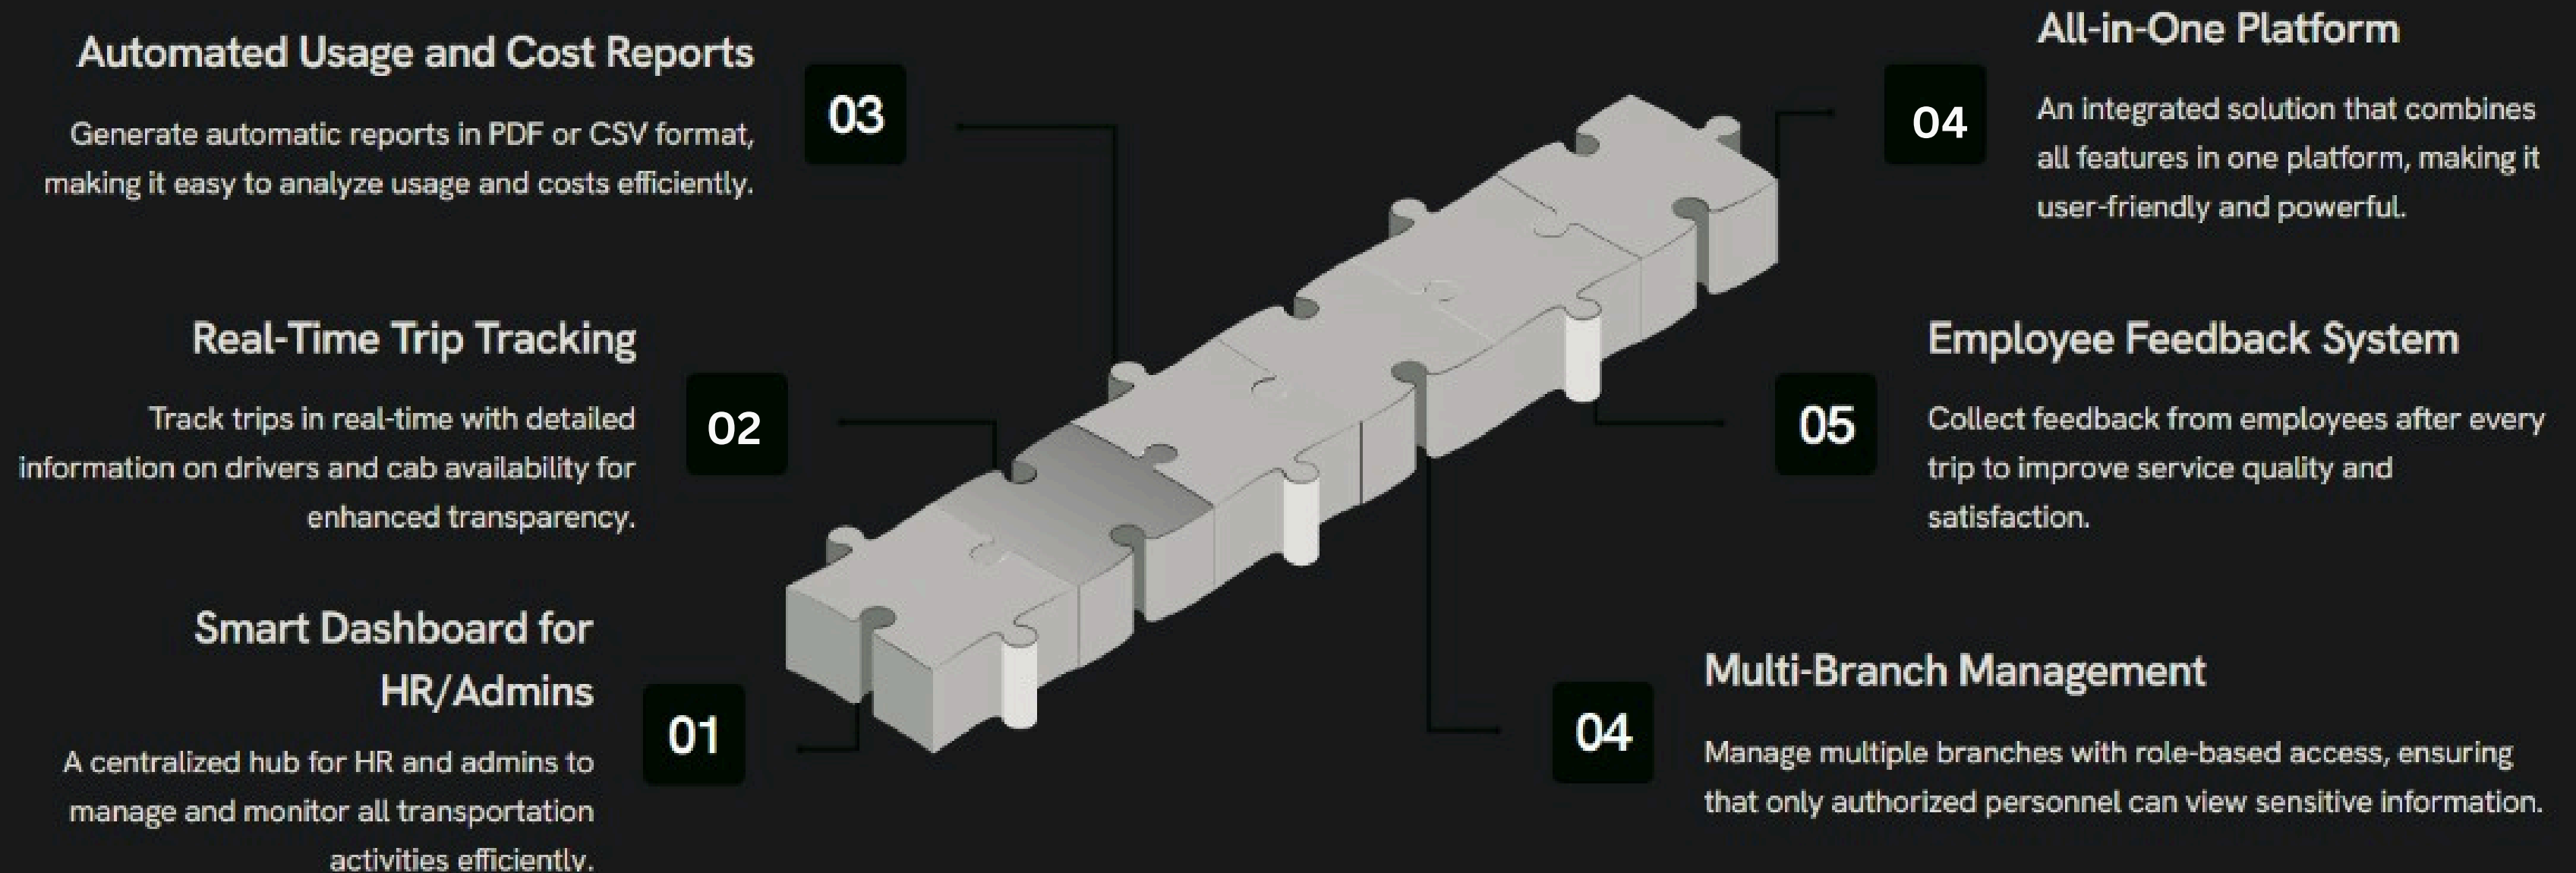

Feedback Mechanism Absence

The absence of a **feedback collection system** prevents the identification of service improvements and customer satisfaction.

Optimizing Corporate Commutes

Smart Features & Tech Stack

01

Live Trip Tracking

Utilizes **Google Maps integration** for real-time tracking of corporate trips, ensuring safety and efficiency.

02

Automated Booking

Offers **automated booking and scheduling** features to streamline the process, saving time for employees and admins alike.

03

Visual Cost Reports

Generates **visual cost and usage reports** to help managers analyze travel expenses and improve budgeting.

04

Employee Feedback

Incorporates **employee ratings and feedback** to enhance service quality and address any issues promptly.

05

Multi-Branch Management

Facilitates the ability to **manage multiple branches**, making it suitable for large organizations with different locations.

06

Frontend Technology

Built using **React.js** and **Tailwind CSS** for a responsive and modern user interface experience.

07

Backend Solutions

Utilizes **Firebase Auth** for secure authentication and **Firestore Database** for efficient data storage solutions.

08

Maps Integration

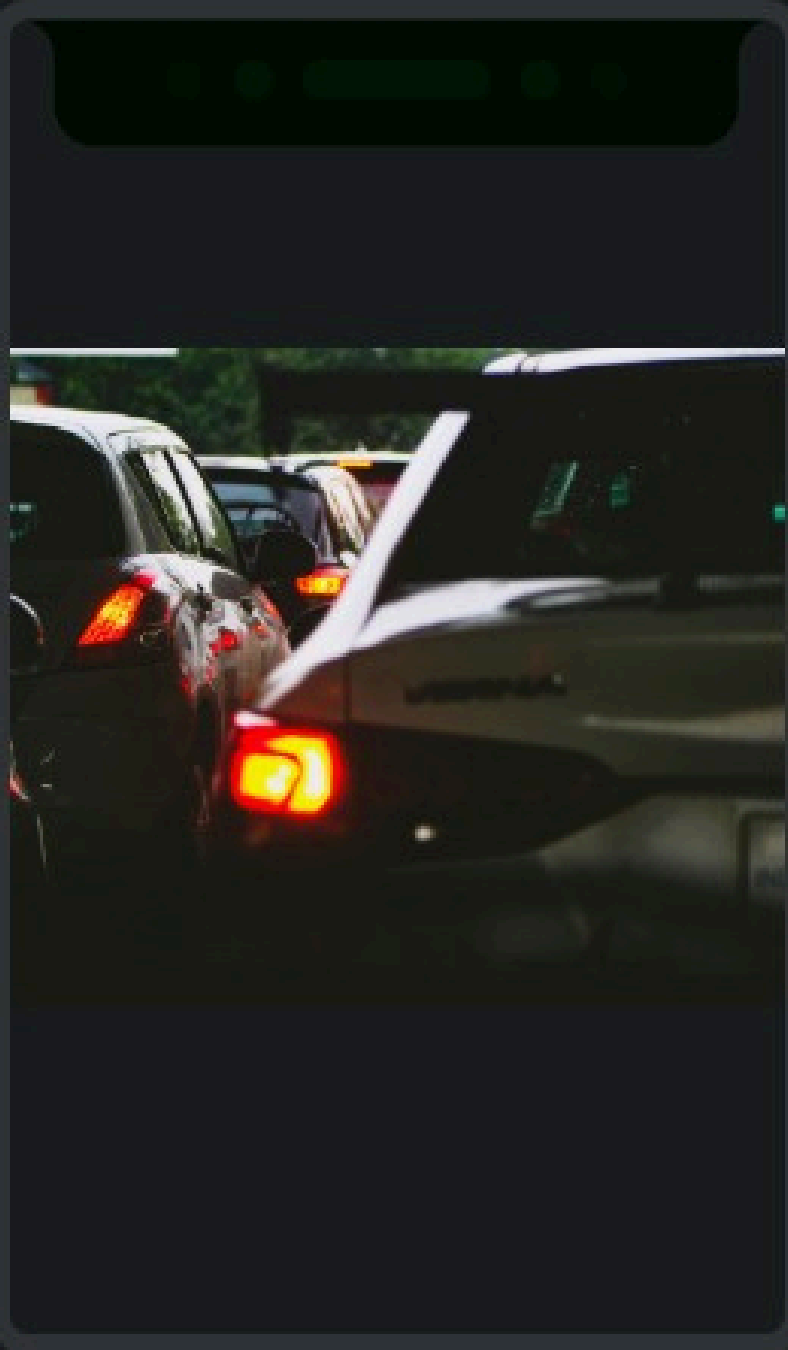

Employs **Google Maps API** and **Fleet SDK** for accurate mapping and routing functionalities.

09

Reporting Tools

Utilizes **jsPDF** for generating **PDF and CSV exports** of reports, enhancing data sharing capabilities.

Impact and Future Scope of CorpCab

Source: Companies Market Cap

01 40% Reduction in admin time

Significantly saves administrative hours, enhancing productivity.

02 25% Decrease in transport costs

Helps in lowering operational expenses, maximizing savings.

03 Enhanced employee commute experience

Improves the overall satisfaction and efficiency of employee travel.

04 Future scope in logistics

Potential expansion into logistics for broader services.

05 Emergency services integration

Plans to include emergency services for enhanced efficiency.

06 School buses provision

Future developments may include school transportation solutions.

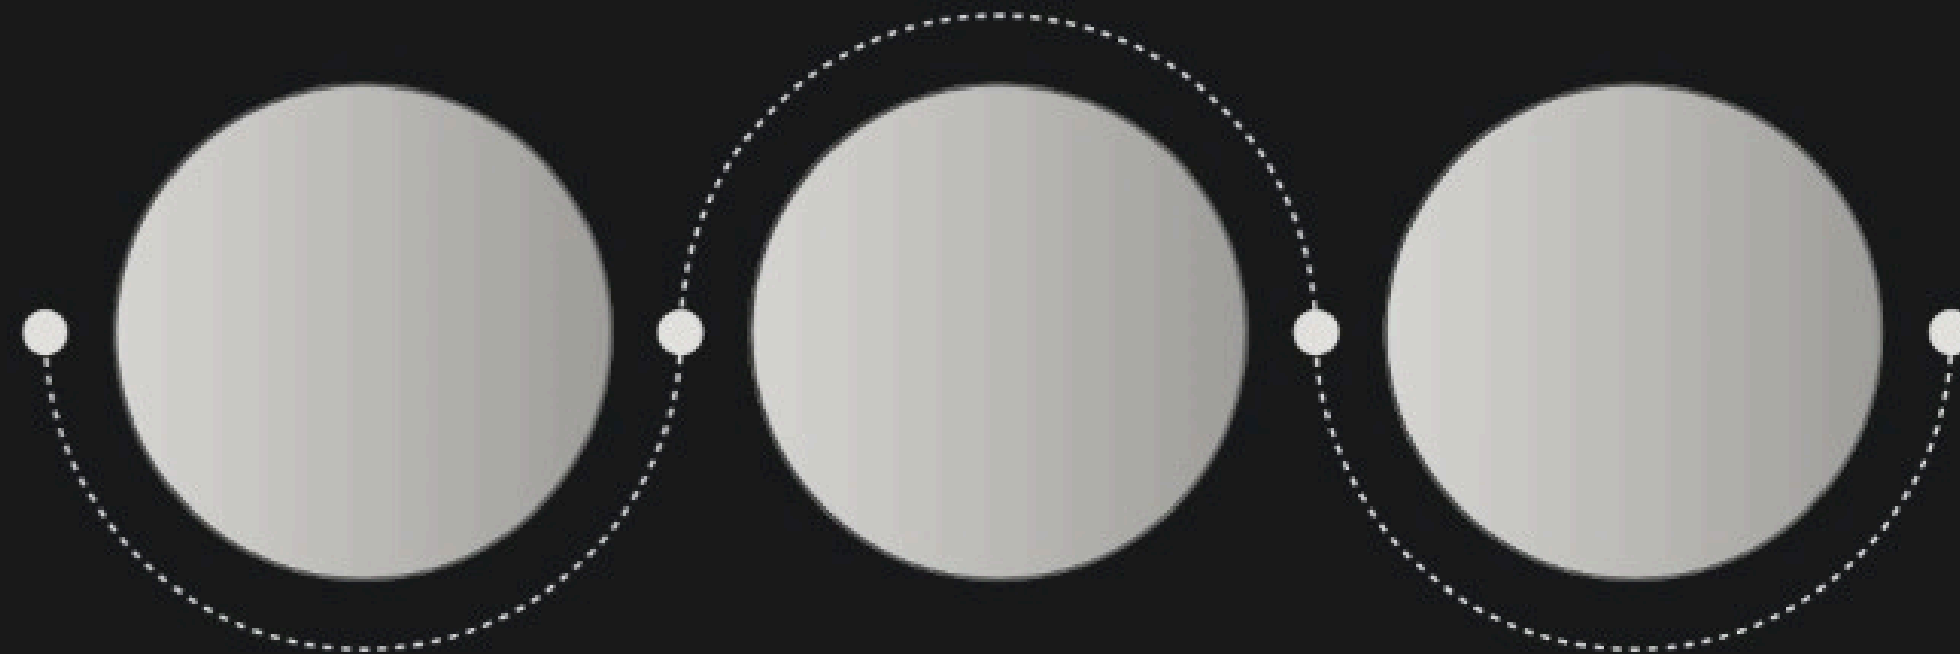

Strategic Growth Initiatives

Build Corporate Partnerships

Continue fostering relationships with **corporations** to enhance service offerings and drive user engagement.

Explore Market Expansion

Investigate **additional markets** for potential growth opportunities, ensuring a strategic approach to expansion.

Enhance User Features

Focus on **enhancing features** based on user **feedback** to ensure the product meets the evolving needs of our clients.
